

ULTRAREZ ZNR

ULTRAREZ ZNR is Zinc Resinate activator having more 7.0 + 0.5 Zinc Content. It finds application in marine paints, where it gives corrosion resistance to the coatings. Also it used as a heat stabilizing and cross - linking resin for various resins used in coatings and adhesives.

The various features and benefits derived with the use of ULTRAREZ ZNR are:

FEATURES	BENEFITS
Good Compatibility	Compatible with all type resins, elastomers
Zinc Functionality additive	Help in corrosion resistance, Stabilization and cross-linking for other resins
Specific Adhesion	Provides improved specific adhesion to a number of substrates.
Suggested Applications	Marine Paints Hot melt adhesives, Sealants Contact adhesives Heat stability of Phenolic resins

SPECIFICATIONS

Softening Point (Ball & Ring)	100 + 10 Deg. C.
Appearance / Color	yellow/amber color opalescent lumps
Acid Value	90 + 10 Mg KOH/Gm
Solubility	Soluble in aromatic and aliphatic solvents
Compability	Compatible with rubber, resin viz alkyd, phenolic etc.
