

ULTRAREZ - PEG SPL

ULTRAREZ-PEG SPL is a pale, thermoplastic tackifier, specially developed for hot melt and solvent based adhesives and other adhesive masses using hydrocarbon and rosin acids.

Product Specifications

Appearance	Pale yellow lumps
Softening Point (Ring & Ball Method)	95 + 5 deg. C.
Acid Value	< 25.
Colour Gardener scale	< 6

Outstanding Characteristics

Ultrarez PEG SPL is soluble in esters, ketones, higher alcohols, glycol ethers, aliphatic, aromatic and chlorinated hydrocarbons, Insoluble in ethanol and water.

Having higher softening point, it imparts better cohesive strength to adhesive bond as compared to ester gum.

Ultrarez PEG SPL has good compatibility with other resins and rubber used in adhesives.
